

- EMPLOYER STUDY 2018 -

Dear Employers

The Lilongwe University of Agriculture and Natural Resources (LUANAR) in collaboration with National Center for Higher Education (NCHE) kindly requests your participation in a study to identify needs of the industry. In this study, we request that you base your responses on your experience with LUANAR postgraduate alumni (**MSc and/or PhD**) who successfully completed their studies between 2007 and 2016. The study will commence on 9th April and will end on 6th May 2018.

The main objective of the study is to establish a tracing system and feedback mechanism between LUANAR and its postgraduate alumni. The study seeks to solicit information on the postgraduate's career path, the relevance of their qualifications and the quality of knowledge, skills and attitudes. The findings from the study will improve LUANAR's postgraduate programs so that they respond to industry needs.

The study will be using an online system to collect data. This will take an average of 15 minutes. A LUANAR system administrator will provide you with secure access details and passwords. All the information provided through this platform will be treated with strict confidentiality and also anonymize the data to any non-statistical tracing of respondents.

We will, therefore, highly appreciate if you will submit to us the filled online questionnaire at your earliest convenience.

For any further clarifications, please do not hesitate to contact the tracer start team leader through aquafish-project@luanar.ac.mw or yngongonda@luanar.ac.mw; You may also call or text to +265 999 222 283

Thank you in advance and we look forward to your participation
